plath acid phosphate. This is simply the phosphate rock dissolved in sulphuric acid, and should not cost over the corn an acre. You sowed the clover too late for your section, but it will make its best growth as spring opens and can be turned under in bloom Fertilizer for Tohacco.

Figure 14 Elects Officers.

Figure 25 Annon. The order of the matter of the first of the first of the matter of the first of Fluvanna County: "Will you kindly advise through The Times-Dispatch what chemicals I should use for to bacco this season, and the best place to buy them. I raise sun-cured to-bacco. Land I will plant is a clover soil that has been cut for hay two seasons. I plowed this land in August and sowed to orimson clover, and have a sould be suggestion that a strain of to-matoes which are able to resist the disease can be made by selection. Is there any other way? May such seed be bought, or is there any germicide that will destroy the fungus in the soil? Kindly reply in The Times-Dispatch. I read your articles regularly, and govern the soil of the second to resist the disease can be made by selection. Is there any other way? May such seed be bought, or is there any germicide that will destroy the fungus in the soil? Kindly reply in The Times-Dispatch. I read your articles regularly, and get valuable suggestions.

and sowed to crimson clover, and have as fine a stand as I ever saw. Will not use any stable manure on it Turning this under, what should I use as a fertilizer and how much an acre?

The low, black land will make good sistant. But there is a good, small his uit shaned to mate that I had from The low, black land will make good corn, but, instead of acid phosphite I would use Basic slag, Thomas phosphate, as it is called, as this carries some lime. It will not pay you to use the ground limestone, for it would take a year for it to have any effect. For potatoes and tomatoes, use the cuit, but it is far better than none, and 7-6-5 fertilizer, at rate of 500 pounds is a wonderful bearer. It keeps fresh in the hill. You could make a different long after it is ripe than any tomato fertilizer for potatoes by getting the I have ever grown, and by careful materials and mixing them yourself, but whether it will pay you to do this, will depend on the area you plant. A some pollen from a neighbor's garden fertilizer made of 200 pounds of acid who can grow good tomatoes, and set who can grow good tomatoes. phasphate, 100 pounds of nitrate of some of the blooms with a camel hair soda, 600 pounds of tankage, 400 brush, you may get a larger fruit with pounds of muriate of potash to make a ton, and used at rate of 1,000 pounds soil with a 2-per cent solution of an acre, will make good crops of potatoes. The 7-6-5 ready-made goods would be rather a costly operation will answer very well for the tomatoes, and is very commonly used here the soil with steam pipes running the soil with steam pipes running through it, and thus raise the temperature to a point where all bacterial life is destroyed, but that, too, would be too costly in the open garden, teiling me all about her troubles from lack of labor and land that is all sand. She falls with peas, and the winter grass runs out her alfalfa, and she wishes to know what to do. On a nine-acre lot of crimson clover she

nine-acre lot of crimson clover she wishes to pasture her cows, and would like to know what fertilizer to appl to it. She wants to turn the alfalfa for late potatoes, as there is lit le of it left. And another piece on weeds she wishes to sow to peas, and wants she wishes to sow to peas, and wants would prove satisfactory here for the a fertilizer. Keeps five horses and local and Richmond markets?" Just mules, and eleven cattle of all ages, what the average price at wholesale and would like to make a dairy farm, if there was labor available.

Under the conditions, it is very hard to advise. The potatoes on turned-am rather sure that as a commercial under alfalfa should make a good crop. If liberally fertilized with a fertilizer running about 2 per cent ammonia, 8 per cent phosphoric acid, and 10 per cent potash. You can get such in Richmond. It will also be good for the clover at rate of 400 pounds an acre, and 500 pounds for late potatoes. On the peas use 300 pounds of a it phosphate and twenty-five pounds of muriate of potash an acre. should make a good crop there is no profit to be made in t home, what Can grow soy beans, too. Better leave the navy beans to the part of the country better suited to them, for it make as perfect a mixture as the fac-tories?" The best way to mix fertilizer cept in a very small way for family use. Get the large white black every y for eash with order, in lots of pounds and upward, prices, per f. o. b.
